Research publication

ANALYSIS OF SECURITY ISSUES IN NOSQL

International Research Journal of Modernization in Engineering Technology and Science

DOI: <https://www.doi.org/10.56726/IRJMETS29728>

CONCLUSION: In this survey, we identified the main security issues such as Sheltering Rectitude, Authentication and Encryption, Data at Rest, Scalability and Availability, Consistency, and then we see the security requirements (Awareness for Threat, Encode the Conscious Catalogue).
